Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Art Unit 1713

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) The invention was described in (1) an application for patent, published under Section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18 and 19 are rejected under 35 U.S.C. 102(b) or (e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over EP 070143 or J09151279.

The rejection as set forth under 35 U.S.C. § 102/103 in Paper No. 4 is deemed proper and is herein repeated.

Applicants' arguments have been fully considered but have been deemed to be not persuasive.

Applicants rely upon the Declaration filed October 7, 2003 to show that the instantly claimed invention is patentably distinct from that of the prior art. The Declaration has been fully considered relative to the prior art and the rejection of record and has been found to be not persuasive.

The Declaration states that Example 4 of the Japanese reference and Example 22 of the European patent application were prepared and the dynamic storage modulus was measured and that this did not meet the property limitation of the instantly claimed invention. This is not persuasive. It is unclear that these examples selected from the prior art are in fact representative of the closest prior art. This is to say that these references are not limited to these examples and it is unclear which ingredients were utilized. This is particularly relevant when reading the European patent application where Example 22 appears to be five different compositions. It is

further unclear as to exactly what is the compositional difference between the instantly claimed invention and those of the prior art. This is to say that compositions falling within the scope of the claim would be presumed to possess properties which either render obvious or anticipate those as claimed. The Examples of the prior art show compositions which fall within the scope of the instantly claimed composition and as such it is reasonable to presume that they possess properties which either render obvious or anticipate the properties as claimed.

Claim 21 is objected to and would be allowable if written in independent form.

Claims 2, 5-7, 10-12 and 23 remain allowed for the reasons of record.
